

## NON-PENETRATIVE SEX (WHEN YOU JUST CAN'T BE FUCKED!)

*Non-penetrative sex is an excellent way to avoid wear and tear on your body, and to avoid sexually transmitted diseases (STDs). Basically, it's any sex that doesn't involve anyone's dick getting into anyone else's body. Wanking, watching, sensual massage, licking, fucking between the legs or under the armpit, and some B & D are all types of non-penetrative sex. It's a service you can sell as a fantasy, too, so charge more.*

*If you get the type of client who wants to know "what are you into?", tell him something that doesn't involve fucking, and get him into the idea of it by saying something like:*

*\* "I'm an expert at this. You won't be disappointed."*

*\* "You can get straight sex from anyone. This is why you've booked me tonight..."*

*\* "I'm bored with straight sex. I've always wanted to try..."*

*\* "We can do straight sex later, darling, if we get time, but I think you'd really enjoy it if we..."*
